TWIN TRANSITION

and Sustainable **Value Creation**

Reimagining Accounting, Banking, and Finance in the Digital and Green Era

SPECIAL TRACK **26**

LEADING THE TWIN TRANSITION: HUMAN-AI COLLABORATION AND RESPONSIBLE ORGANISATIONAL CHANGE

TRACK CHAIRS

Maria Menshikova
Mercatorum University

Stefano Di Lauro
Mercatorum University

Alessandra Ricciardelli
Mercatorum University

Isabella Bonacci
Mercatorum University

Danila Scarozza
Link Campus University

TRACK DESCRIPTION

This track welcomes contributions on human–AI collaboration and organisational change in the twin digital and green transition, particularly in accounting, banking and finance. This track encourages studies on leadership, work design, employee participation, organisational learning and knowledge sharing, exploring how organisations combine AI capabilities with professional judgement and contextual knowledge. This track particularly welcomes research on workforce transformation, emerging roles, digital and sustainability skills, cross-functional coordination and responsible AI-supported decision-making, including human oversight, accountability and trust. This track also invites work on algorithmic bias, explainability, employee engagement, resistance to change, deskilling and over-reliance on automated advice, alongside applications in sustainability reporting, auditing and climate risk management. Conceptual, qualitative, quantitative, comparative, longitudinal and mixed-method contributions are welcome, examining how organisational capabilities and governance arrangements support responsible decisions and sustainable value creation across different professional and institutional contexts.

KEYWORDS

Twin transition · sustainable value creation · human–AI collaboration · leadership · responsible organisational change
