Bruno Notarnicola
University of Bari Aldo Moro

Pietro Alexander Renzulli
University of Bari Aldo Moro

Benedetta Esposito
San Raffaele University Rome

Stefania Supino
San Raffaele University Rome

Daniela Sica
San Raffaele University Rome

TRACK DESCRIPTION

This track welcomes contributions on management systems and tools supporting the integration of sustainability and circular economy principles into organisational strategies, processes and operations. This track encourages studies on the design, adoption and implementation of standards, measurement frameworks and decision-support tools for planning, monitoring and continuous improvement. This track particularly welcomes research on circularity indicators and life cycle-based approaches, including Life Cycle Assessment, Life Cycle Costing and Social Life Cycle Assessment, to evaluate environmental, economic and social performance across products, processes and organisational activities. This track also invites work on combining measurement tools with management systems to inform strategic and operational decisions, and on digital technologies that improve data collection, availability, traceability, monitoring and performance assessment. Theoretical, empirical and conceptual contributions from management, sustainability and related disciplines are welcome, advancing understanding of managerial mechanisms supporting sustainable and circular organisations.

KEYWORDS

Circular Economy Management · Circular Economy Measurement · Life Cycle Thinking · Sustainability Management · Sustainability Measurement

IMPORTANT DATES

14 Feb 2027	28 Feb 2027	31 Mar 2027	30 Apr 2027	3–4 Jun 2027
Extended abstract and full paper submission	Notification of acceptance	Early registration deadline	Late registration deadline	Conference in Bari
