TWIN TRANSITION

and Sustainable **Value Creation**

Reimagining Accounting, Banking, and Finance in the Digital and Green Era

SPECIAL TRACK **28**

ORGANIZING HEALTHY AGEING ACROSS THE DIGITAL AND GREEN TRANSITIONS: SKILLS, CARE INNOVATION AND TERRITORIAL NETWORKS

TRACK CHAIRS

Alessandra Ricciardelli
Mercatorum University

Diego Ponte
University of Trento

Lorenzo Mercurio
University of Naples Federico II

Anne Marie L. Husebø
Stavanger University

TRACK DESCRIPTION

This track welcomes contributions on organisational transformation for healthy ageing, examining how digital innovation can support effective, equitable and environmentally sustainable health and care services. This track encourages studies on professional skills, lifelong learning, retraining, intergenerational knowledge exchange, clinical judgement, human oversight, accountability and cross-organisational working practices, and responsible adoption of artificial intelligence. This track particularly welcomes research on co-design, testing and validation of digital health and assistive technologies with older people, caregivers and professionals, assessing usability, acceptability, health outcomes and organisational effects across care settings. This track also invites work on territorial collaboration, shared infrastructures, care coordination, knowledge exchange and inequalities in access and resources, alongside environmental implications for travel, facilities, equipment and digital infrastructure. Conceptual, qualitative, quantitative, comparative and mixed-method contributions are welcome, exploring synergies and tensions between digital transformation, quality of care, accessibility, equity and environmental sustainability.

KEYWORDS

Healthy ageing · Digital health · Green transition · Organizational capabilities · Care innovation
