TWIN TRANSITION

and Sustainable **Value Creation**

Reimagining Accounting, Banking, and Finance in the Digital and Green Era

SPECIAL TRACK **33**

THE FINANCIAL SYSTEM IN THE ERA OF ARTIFICIAL INTELLIGENCE AND DIGITAL INNOVATION

TRACK CHAIRS

Rosa Cocozza
University of Naples Federico II

Domenico Curcio
University of Naples Federico II

Serena Gallo
University of Naples Federico II

Davide Vioto
European Banking Authority

TRACK DESCRIPTION

This track welcomes contributions on how artificial intelligence and digital innovation are transforming financial institutions, markets, and financial intermediation. This track encourages studies on artificial intelligence adoption, business models, competition, and applications of machine learning, Big Data, and alternative data in credit assessment, lending, financial inclusion, and risk management. This track particularly welcomes research on generative artificial intelligence, natural language processing, model reliability, explainability, algorithmic bias, data governance, and accountability in financial services. This track also invites work on crypto-assets, stablecoins, tokenized assets, central bank digital currencies, and their implications for payments, deposit funding, and financial intermediation. Further contributions may examine digital customer relationships, consumer protection, operational resilience, cybersecurity, systemic risks, and regulatory and supervisory challenges. Both empirical and theoretical approaches are welcome.

KEYWORDS

Digital Finance · Artificial Intelligence · Financial Institutions · Regulation
